By fitting a second seat row with an integrated partition wall it is possible to convert your Expert panel van into a Crew Van at all times. The perfect solution for the combined transport of people and material.

Meet your every need

Obviously the Crew Van applies to the European safety standard. All seats are provided with 3-point inertia-reel safety belts and tiltable and in height adjustable head restraints.

The partition wall is designed to meet the ISO 27956:2009 standards for load shifting protection.

Also the design plays an important role when developing a Crew Cab. The finely designed partition wall separates the load and passenger compartment completely.
With the Essential double cabin, safety and functionality come first. This double cabin can accommodate up to six people while still providing a cargo area in which you easily transport all the necessary materials and tools needed for a six crew project.

All seating positions are equipped with European approved 3-Point inertia-reel safety belts. The 3-seater contoured bench is covered with cloth as the front seats.

**Professional fittings**

- Luxury bench cover with storage pockets
- Additional load space under the bulkhead
- Comfortable 3-Seater bench, covered with cloth as front seat
- Luxury step-in cover
